# A COMPREHENSIVE SOLUTION TO FACE THE RISKS ASSOCIATED WITH REMOVABLE MEDIA USE

TYREX offers a **unique comprehensive solution** which includes a **Management Server** for centralised administration and supervision of all kiosks and an **Agent** which grants access to removable devices content which has priorly been certified by a TYREX station.

## THE WORKSTATION PROTECT AGENT

The agent is a software program, installed on workstations, that grants access to the content of removable devices that have been certified by a TYREX station. It blocks access to files and devices that have not been certified, providing a maximum level of security.

All of our products have the same level of **safety, efficiency** and **functionality**.

## TYREX CONSOLE

The TYREX CONSOLE can fit on a desk or a bracket and can be used in a typical workspace environment.

## TYREX TOTEM

The TYREX TOTEM can be placed on the floor, which makes it suitable for high-traffic areas and reception halls. It comes with a shelf to hold the hard drive.

## MANAGEMENT SERVER

Manage and supervise of all the TYREX kiosks within a customer perimeter. Can be deployed as SaaS, dedicated SaaS or in an On-Premise environment, connected or disconnected.

## TYREX MOBILE

The TYREX MOBILE meets the needs for a use in an hostile environment. It is MIL-STD-810-H, IP65 and ATEX certified and designed for outdoor use.

## TYREX SATELLITE

The TYREX SATELLITE can be hung on a wall, it is a perfect fit for small, operational environments such as ships or meeting rooms.

# TYREX BENEFITS

**ALMOST 30% OF CYBER INFECTIONS RESULT FROM USB REMOVABLE DEVICES!**

File transfer,  
key to key copy

Multisupport USB  
management

IT and industrial  
workstation Protection

On-line and  
Offline modes
